

Install *PaperStyle: Digital Notebook*

A short guide for Mac and Windows. It takes about two minutes, and you only do it once.

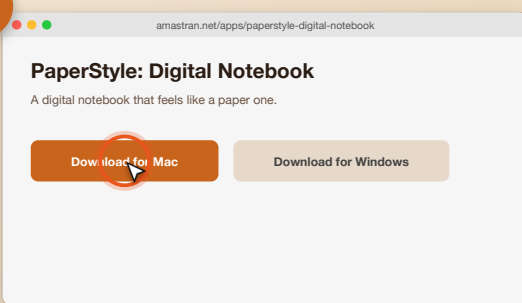

Why do I see a warning?

Mac and Windows show a warning the first time you open an app whose small independent maker has not yet bought the yearly “verified developer” certificate. PaperStyle: Digital Notebook is made by Amastran NET, and we have not bought one yet. The warning is about who the maker is, not about a problem in the app. Your notebooks stay on your own computer.

Download only from your Whop page or amastran.net/apps/paperstyle-digital-notebook. If a file came from anywhere else, do not open it.

On a Mac

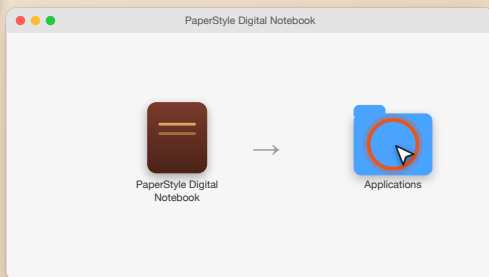

1

Download the Mac package

On your Whop page or on amastran.net, click **Download for Mac**. You get one zip file with the installer, this guide and short videos. Only download it from there.

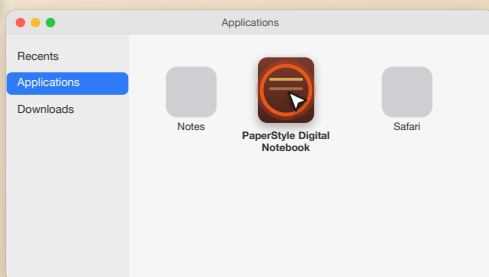

2

Drag it into Applications

Open the zip you downloaded (many browsers open it for you), then open the **.dmg** file inside the folder. Drag **PaperStyle Digital Notebook** onto the **Applications** folder. If dragging does not work: right-click **PaperStyle Digital Notebook**, choose **Copy**, open **Applications** from the Finder's **Go** menu, then choose **Edit > Paste Item**. Last, **eject the installer disk** and open PaperStyle from Applications (it cannot update itself when opened from the disk).

3

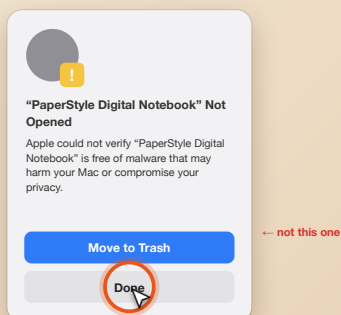

Open it from Applications

Open the **Applications** folder and double-click **PaperStyle Digital Notebook**.

On a Mac (continued)

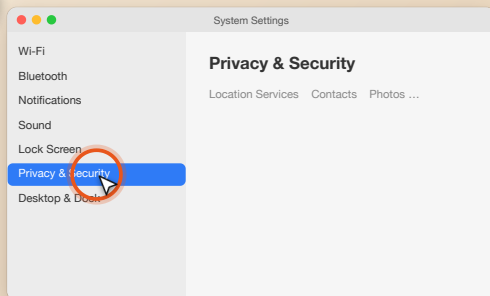

4

Click Done

A message says Apple could not verify the app. Click **Done**. Do not click Move to Trash.

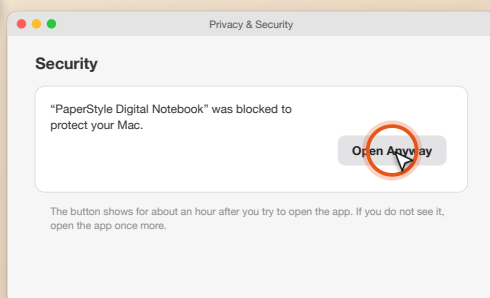

5

Open System Settings

Click the **Apple menu** at the top left of your screen, then **System Settings**, then **Privacy & Security**.

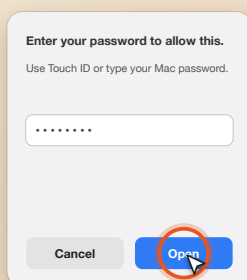

6

Click Open Anyway

Scroll down to **Security**. Next to the message about PaperStyle Digital Notebook, click **Open Anyway**.

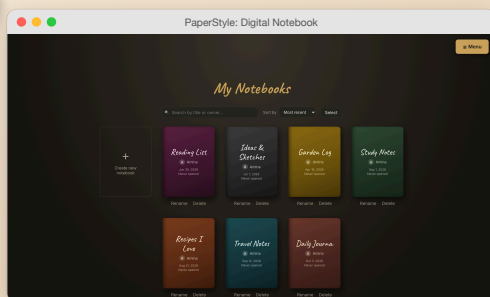

7

Enter your password

Type your Mac password (or use Touch ID), then click **Open** if a box asks you to.

8

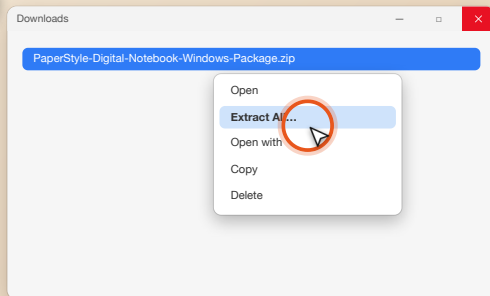

You are done

PaperStyle: Digital Notebook opens. You only do this once. Next time it opens like any other app.

On Windows

1

Extract the zip

Download the Windows package from your Whop page or amastran.net. Right-click the zip file and choose **Extract All**, then click **Extract**.

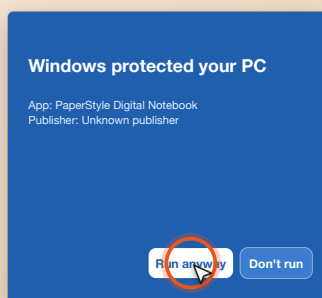

2

Run the installer

Open the **Setup** file inside the new folder (do not run it from inside the zip). If you see **Windows protected your PC**, click **More info**.

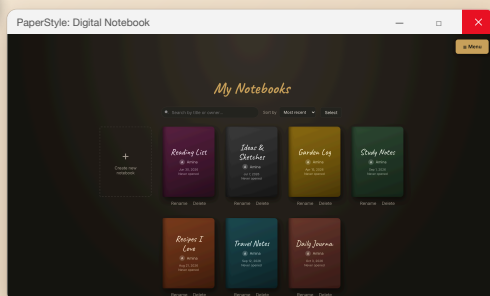

3

Click Run anyway

The app name shows up. Click **Run anyway**, then follow the installer.

4

You are done

The app installs and opens. You only do this once.

Still stuck on a Mac?

If you do not see **Open Anyway**, open the app once more and look again in Privacy & Security. The button only shows for about an hour after you try. Or open **Terminal** (press Command + Space, type Terminal, press Return), paste this one line, press Return, then open the app again:

```
xattr -dr com.apple.quarantine "/Applications/PaperStyle Digital Notebook.app"
```

It only removes the “downloaded from the internet” mark from this one app.

Next: your email and your license

Open PaperStyle: Digital Notebook. The first screen asks for your email address: type it, click **Email me a code**, then type the code from the email. This starts your 14-day free trial. **Already bought PaperStyle?** Click **I already bought PaperStyle** at the bottom of that screen instead, then the button that says **... by email**. Type the email you bought with, click **Send recovery code**, type the code and click **Continue**. If that email has more than one license, choose which one to use on this computer.
